- a Math &141, &142, &151 and 147 require significant time and effort, often considerably more than the minimum of 10 hours of out-of-class study time per week normally needed for other math classes.
- b Math 106 is designed as a condensed review of the topics in Pre-calculus (Math &141 and &142). The coursework requires more than the minimum of 10 hours of out of class study time per week.

- **Placement by this method expires one academic year after the student graduates from high school. The sooner the student takes his or her math class at GRCC, the better success the student is likely to have, since math skills tend to be forgotten over a period of time.**
- **Please communicate to the students that if, after the quarter starts, they feel they have been placed too high, they should talk with their instructor.**
