

Critical Thinking Questions

Purpose: The following questions are designed to lead you deeper into the meaning of a text. While these questions can be useful for reading and studying texts for this class, they also can be a helpful study tool for other classes, especially ones in which you are struggling to understand the content.

1. ***Paraphrase:*** Put the selected text into your own words. What do you think this author is saying here?
2. ***Connect:*** Now write down some example or illustration of this quote that connects it to your experience. For example, try completing this sentence. “This quote is saying something similar to X, which I’ve experienced or know about.”
