

## EL Civics

### Parking at GRCC

- Give students a KWL chart on the topic "Parking at GRCC" to fill out individually
- Students fill out the "K" and the "W" sections
- In small groups, students discuss what they know and what they want to know about this subject.
- In the large group, students volunteer questions about parking that they do not know the answers about. There will probably be a general discussion at this point where questions and answers may be volunteered. At the end of this discussion, the teacher needs to have a list of questions that students want to know the answers to.
- The teacher helps students to find ways to answer their unanswered questions (direct them to the GRCC student handbook, direct them to the GRCC college catalogue, help them write a survey to ask GRCC students, invite a parking/security person into your classroom.)
- Follow up on the above activity with your students by having students fill out the last section of their KWL chart, what you have learned.
